OS Pricing & Licensing Changes

On October 1st 2010 Ordnance Survey announced major changes to the Pricing & Licensing Agreements that they extend to Licensed Partners such as ourselves.

Headline pricing news

Setting aside any changes to VAT in 2011, we can confirm that none of our prices will see any increase as a result of changes to Ordnance Survey's prices to us. Indeed for those customers taking larger areas of data the savings could be as much as 70% discount in certain areas.

Furthermore there are no longer any restrictions on the product range or area of coverage Partners can supply. This means that for the first time ever Ordnance Survey's own direct pricing is now in line with those from Partners like ourselves and we would therefore encourage all customers, irrespective of size, to contact us to discuss a) how the changes might save you money and b) how the increased product range might offer better ways of doing the same thing for less.

Phase 2

It is important to note that the announcement on October 1st relates to Phase 1 of the process and only deals with pricing and licensing for data sales (dxf/ dwg/ shp), as opposed to "paper" plots and image files (pdf/ tiff/ doc e.t.c) which will be covered separately in Phase 2, early in 2011. Possible changes to the OS view charge structure for the large-scale dataset OS MasterMmap will also be looked at in Phase 2

Headline Licensing news

We are pleased to announce that the new terms governing the usage of OS MasterMap data will be covered by one licence only, thereby replacing the existing IBU and PDB options. The very popular archiving and sharing elements of the PDB Licence will be incorporated into the new version along with the ability to purchase the data for 1, 2 or 3 years. Also, rules governing what constitutes derived data have been made much clearer. As with the pricing we have produced a more comprehensive summary document that is available from the Service Centre upon request.

Registration and view charges (Stanfords Portal)

In order to register for Stanfords Portal, a registration charge of £1.50 + vat must be paid via the World Pay credit/debit card site. This is a one off registration charge to cover the administration of account set up & proof of registrants' commitment & ability to pay all OS view charges & any map or data purchases.

Every time Stanfords & our customers view Ordnance Survey mapping a set royalty payment is due to Ordnance Survey. Whenever the results of a location search are displayed on screen a 75p charge is applied – this allows you to view up to 36 hectares of large-scale mapping. If you wish to switch on an additional 36 hectares of data (for larger sites e.g) this is possible in our site but would incur a further charge of 75p + vat. There may be changes to these view charges as part of phase 2 and we would expect that they will either stay the same or decrease in cost. No-one is expecting any increases.

OS Master Map in dxf/ dwg/ shp format

As per the introduction above the good news is that none of our prices below have increased. Ordnance Survey's new pricing structure means that existing prices up to the 25 hectare mark have to remain the same as before, but at least there's no rise. Post 25 hectares the savings can be seen very quickly – for example 1km² used to cost £705 in Stanfords Portal for urban (settlement) data and now costs only £237.

You will also note that there is a price differential between our Stanfords Portal prices and our Service Centre prices. We will always offer a supply channel through the Service Centre and there are some customers who, for whatever reason, prefer to outsource the production to us but there is understandably a premium attached to this.

Self-serve through Stanfords Portal

	Settlement data (£) + vat	Rural data (£) + vat	Moorland data (£) + vat
1 hectare	13.95	13.95	13.95
Hectares 2 - 4	6.95	2.00	2.00
